

Level 1: Puppy Kindergarten & Beginners

Now where the fun learning begins!!! Our Puppy K class is for puppies ranging from ages 3 to 6 months.

Beginners is the same program, but we prefer to separate older dogs who may not have the patience and tolerance for the very young at heart. We accept dogs ranging from 5 months and up.

This level is filled with information on how to raise and train your dog through constructive play, discipline, and socialization. We train in a strictly pawsitive fashion, teaching your dog to think.

Food and toys are used initially as a motivator/reward, but when the dog begins to understand, these are faded quickly. By teaching your dog with love and patience, you develop a life long relationship that will create a bond you may never have achieved with any dog prior.

Teaching a dog to think, and not just react because of "punishment" ways of training, creates a healthy, happy dog, who wants to be pleasing you at any opportunity. Patience is a must, because it can at times take a little longer for the light to turn on in that busy little puppy brain or the older dog who hasn't had the opportunity to think ideas through before, and hasn't had someone try to nurture and accept their level of understanding, but when it does, watch out!!!

You will be able to obtain levels of communication you never, ever thought possible!
