

## Puppy Preschool

Now this is where the fun begins! A 6 week "get together" for the very young 9 to 16 week old puppies. Proof of vaccination is a must - they must have had one set of vaccinations.

This class introduces your puppy to others, where they learn to socialize with other people and fellow puppies. Your puppy will be allowed to interact with the other puppies under supervised conditions, thus learning to be happy & well adjusted.

And you will be thrilled to have a very tired puppy when you go home! A great beginning before you enter Puppy Kindergarten.

You'll wish they could attend puppy school everyday!
